---	--

For Quantities—Follow the cipher word with squares, sheets, bundles, only, pairs, rolls, dozen, hundred, gross, pounds, tons, boxes, whichever is meant, and for SQUARE FEET use the word "SQUARE-FET," and for LINEAL FEET use the word "LINFET."

For Prices—Always prefix the word PRIX before the cipher word; the last two figures of a cipher word will always be construed to be CENTS, except the word DOLLARS follow the cipher word, when the cipher word will be taken to mean dollars only, viz.: "Prixcnn" means \$1.00; "Prixcnn dollars" means \$100.00; "Prixwww" means \$9.99; "Prixwww dollars" means \$999.00. The prix in every case to be joined to the first cipher word, making one word.

"A few facts without varnish are more convincing than
a page full of enthusiastic misrepresentation."

CONDITIONS

1. This catalogue cancels all previous ceiling catalogues.
2. Prices are subject to change without notice.
3. All agreements are made contingent upon strikes, fires, accidents, or causes beyond our control.
4. We make no charge for packages.
5. A square means 100 square feet (or 10' x 10') covering measure on a plain surface.
6. Under no circumstances will we accept goods returned without our permission.
7. All our goods are as represented and are guaranteed by us.
8. All our Metal Ceilings, etc., are painted in a prime coat of white lead and oil, both sides.
9. Terms are net thirty days, subject to draft at our option. If cash is remitted with the order we allow 2% off.
10. All prices are F.O.B. Oshawa, Toronto, Montreal or Ottawa.

METAL CEILINGS

How to Order

Accuracy in taking measurements is of the greatest importance. We will not be responsible for the result of work prepared from incorrect measurements and information. Measurements to in any way differ from the measurements used in preparing our Construction Drawings will make a difference in the material to be used; such differences must be made good only at the expense of the purchaser.

For preparing a design for any room or space we must have a Plan indicating shape, measurements to be taken on wall line so as to show all offsets and projections, if any. Also total lengths and widths should be given to verify divided measurements on a broken or irregular wall, and all measurements should agree.

If all walls are not parallel, note measurements to give correct angles.

In selecting a Catalogue Design state depth or vertical height of Cornice wanted.

Make note on sketch of any space where it may not be possible to use the depth Cornice selected.

Where there are stairways, Elevator Openings, etc., note whether Cornice can or cannot finish around same.

Remember that suppositions cannot apply to this work; we know only the information placed before us.

From accurate information we make for the use of the Constructor a Construction Drawing showing information in detail; thus it is easy to apply our Metal Ceilings.

Special Notice

READ CAREFULLY

Examine and **tally off** all goods in the original shipments with detail memorandum list of stock shipped.

We make corrections for shortage on the original shipment only, if any exists.

Our drawings are to scale, and strictly in keeping with measurements furnished us. The goods shipped will cover spaces shown on drawings, and no more.

If any waste is made, or the measurements given us not accurate, and more material needed, we will **charge extra for same, at PRO RATA prices, express or freight charges added.**

Therefore, it is necessary to make **measurements accurate** and **plain** before sending them to us for working plans and designs; this **avoids trouble, saves time and extra cost.**

Our plans and designs locate centre pieces to conform to multiples of style of ceiling plates used, and we are not responsible for any cost of removing Gas or Electric drops.

Quotations on Complete Ceilings or Side Walls do not include Wood Furring Strips or Solid Sheathing.

The Pedlar People
" Keeping Everlastingly at it Brings Success "

DIRECTIONS FOR APPLYING OUR STEEL CEILINGS AND SIDE WALLS

WOOD BACKING

If it is possible, we recommend the application of all Metal Ceilings and Walls over close Sheathing. This sheathing does not necessarily need to be expensive, indeed cheap dressed stuff is all that is required. Should wooden Furring strips be used, they ought to be dressed $\frac{7}{8} \times 1\frac{1}{2}$ " stuff, and should be applied at 6" centres for panels 24" x 24" or any multiple thereof, and properly spaced to carry Mouldings, Borders, Coves, etc.

LAYING OUT

Great care must be taken in laying out a Metal Ceiling, as this is really THE important item of the work. To lay out a Ceiling, use a fine chalk line, and strike the lines on the Ceiling to correspond with outside beads on Panels. The filler will take up any difference in the size or shape of the rooms.

APPLYING

Place the Cove in position first, starting at one corner of the room, with a mitre. Run the Cove all around the room. When this is done, fill in the centre with Field Panel. All joints in the Coves, Mouldings and Panels, should lap *away* from the light, and *not* against it. To ensure uniformity of surface on the Panels, etc., it is necessary to only nail at the points provided, as the deep embossing affords the necessary rigidity. Use a sharp punch for making the nail holes where there are more than two thicknesses of metal. Hammer down or *swedge* with a small, dull tool, any joints which may not have lapped tightly. This renders all joints tight and unnoticeable.

WALLS

Always apply wall material on sheeting boards; at least, for the first six feet from the floor.

The Pedlar People
"Keeping Everlastingly at it Brings Success"

This engraving shows the variety of arrangements it is possible to execute with our panels Nos. 4, 5, 6, 7 and 8. The moulding is pressed in the panel and is not a separate member.

The Pedlar People
" Keeping Everlastingly at it Brings Success"
CEILING DESIGN OR WALL PANEL

This arrangement is composed of panels Nos. 4, 6 and 8, which are the newest and most up-to-date on the market. The arrangement as shown covers a space 6x8 ft. The same general effect can be worked out in most any sized room, though for odd-shaped rooms it might be found necessary to add a filler to take up uneven spaces. The embossed mouldings shown are a part of the several panels, and are not a separate member. Where pattern is to be worked out in larger spaces, the arrangement is to be left to us, or we will submit such arrangement for approval. Scale 1 in. = 1 ft.

The Pedlar People

“ Keeping Everlastingly at it Brings Success ”

CEILING DESIGN OR WALL PANEL

This arrangement covers 6x8 ft., though with some slight modifications, depending entirely on the shape of the space to be covered, the same arrangement can be made to fit any sized room. It is composed of panels Nos. 4, 5 and 8, all of which cover 24x24 in. Scale 1 in. = 1 ft.

The Pedlar People

"Keeping Everlastingly at it Brings Success"

CEILING DESIGN

Illustrates half a design of a ceiling, the part shown covering 6x8 ft. Most all ceiling designs, however, can be arranged to fit different sized rooms with some slight changes. Scale 1 in. = 1 ft.

The Pedlar People
" Keeping Everlastingly at it Brings Success "

HALL CEILING DESIGNS

Is composed of panels Nos. 7 and 9, and the illustration shows a covering size of 4x8 ft. An exact reproduction of this design would make a very elegant ceiling for a hall or narrow room. Scale 1 in. = 1 ft.

The Pedlar People
"Keeping Everlastingly at it Brings Success"

SMALL CEILING DESIGNS

Is a suggestion for a hall or narrow room ceiling, the cut as shown covering 4x8 ft.
Scale $\frac{3}{4}$ in. = 1 ft.

Is a suggestion for a small ceiling, 4x8 ft., though the same arrangement can be enlarged to suit most any room.
Scale $\frac{3}{4}$ in. = 1 ft.

The Pedlar People

“ Keeping Everlastingly at it Brings Success ”

CEILING DESIGN

Illustrates a ceiling composed of panels No. 235, surrounded by panels No. 83, 84 and 85, which is of Rococo design. Space covered is 16x18 ft., though the same design can be used on most any sized room with some slight changes. Centre panel can be changed to suit size of room, and will be charged for extra according to size and pattern. Scale $\frac{3}{8}$ in. = 1 ft.

The Pedlar People

“ Keeping Everlastingly at it Brings Success ”

Illustration shows the manner in which it is possible to panel ceilings to give them a massive or heavy appearance. The centre panels used in the above designs are No. 169, surrounded by panel No. 168. The false beam arrangement of panel can be made any depth or width to suit requirements.

The Pedlar People
"Keeping Everlastingly at it Brings Success"

CEILING DESIGN

Panels No. 143, 144 and 145, all 1 in. deep. Dividing mould No. 319 has a further depth of 2 in. This design is most suitable for large high ceilings, as the depth of the panels and moulding give it a very massive appearance. With some modification of the arrangements the same parts can be suitably arranged for any large ceiling. **Must be applied on 1x1½ in. strips.** Size of design shown by cut 11x14 ft. Dividing mould No. 319 is provided with pressed zinc, L's-T's and X's. Scale ½ in. = 1 ft.

The Pedlar People

"Keeping Everlastingly at it Brings Success"

CEILING DESIGN

Size of cut 9x11 ft. Panels have a depth of 1 in. and must be laid on strips. Ceiling as illustrated is intended for use in large rooms. Composed of centre No. 131 special, panels Nos. 148 and 150, border strip No. 264.
Scale $\frac{3}{5}$ in. = 1 ft.

The Pedlar People

"Keeping Everlastingly at it Brings Success"

CEILING DESIGN

This is a very neat and attractive arrangement and is recommended for use where heavy lines are not required. Composed of field panels No. 239, surrounded by panels Nos. 224 and 225. Filler No. 263 is used when necessary to take up any unevenness of the room. Cove No. 292 is shown, though any cove having the desired depth can be used. Size of cut $9\frac{1}{4} \times 11\frac{1}{4}$ ft. Scale $\frac{3}{8}$ in. = 1 ft.

The Pedlar People

"Keeping Everlastingly at it Brings Success"

INTERIOR OF SEMINARY CHAPEL, QUEBEC CITY

The whole of the interior of this beautiful structure, including pillars, Capitals, Gallery Rail, Cornices, Walls, Ceilings, etc., from the floor up was manufactured from Sheet Steel and Sheet Zinc, and placed in position by us.

Photographic Reproduction.

The Pedlar People
"Keeping Everlastingly at it Brings Success"

CEILING ARRANGEMENT

Size of cut 6x8 ft. Composed of panels No. 143, 24x24 in. No. 144, 12x24 in. and No. 145, 12x12 in. in combination. These panels can be used to form combinations to fit almost any size room, but as they are deeply embossed, they must be laid on $1 \times 1 \frac{1}{2}$ in. wood strips.
Scale $1 \frac{1}{4}$ in. = 1 ft.

The Pedlar People

** Keeping Everlastingly at it Brings Success

CEILING DESIGN

Size of cut 10x11 ft. Composed of field panel No. 185 with dividing mould No. 355. Centre panel No. 191, 24x24 in.
A very complete and neat arrangement and highly adaptable for any first class work. Scale $\frac{1}{2}$ in. = 1 ft.

The Pedlar People

"Keeping Everlastingly at it Brings Success"

CEILING DESIGN

The arrangement as shown covers 11x13 ft., though with some slight changes the same parts can be arranged to fit any large room. Panel No. 235 is sharp in relief and of Rococo style of architecture. Dividing mould No. 320 is $1\frac{1}{2}$ in. deep, and has pressed X's, T's and L's. Scale $\frac{1}{2}$ in. = 1 ft.

Pedlar's Sheet Metal Building Materials produce certain results obtainable by no other building materials. You cannot obtain "Pedlar" results with incorrect or half correct or poorly made goods. You may purchase at a low price goods that, to the inexperienced eye, look like "Pedlar" goods, and they may answer a purpose after a fashion, but time will soon show that the original "Pedlar" Products at a fair price are the most economical in the end. Brains, skill and experience through nearly half a century of development make our products standard of their kind on the market.
