- 2 Supply wagons.

## SLEIGHS.

- 5 Hook and ladder truck sleighs.
- 12 Two-horse hose sleighs.
- 4 One-horse hose sleighs.

## IN RESERVE.

- 1 Spare hook and ladder truck.
- 1 " " " sleigh.
- 1 Spare four-wheeled hose wagon.
- 5 Spare hose reels.
- 4 Spare hose sleighs.

## HORSES.

During the year, eight horses were purchased, one was sold, one died, two were exchanged, two were transferred to the Street Commissioner's Department.

There are now in the service fifty-eight horses, of which four are spare.

There are some horses in the Department which are nearly worn out, and will shortly have to be replaced by new ones.

The general health of the horses has been good, considering the hazardous service they are required to perform.

Hay, oats and feed are purchased on the market at the lowest possible prices, and with the greatest economy.

RECOMMENDATIONS.

I would call your attention to the necessity of providing a 65-ft. aerial hook and ladder truck for the business portion of the City, as it is greatly required, and should be provided for during the ensuing year.

Truck No. 1 is very prompt in reaching fires, and as efficient as can be expected, but is totally inadequate for the requirements of the business portions of the City. It is with great difficulty that the 65-ft. Bangor ladder now in

service can be raised, on account of the numerous overhead wires, and I trust your Committee will consider the advisability of placing these wires underground, as I consider them a dangerous construction, and one which greatly handicaps the efficiency of the Department in the extinguishment of fires and saving of life.

I beg to recommend that a relief engineer be appointed to take charge of the several fire engines in the absence of the regular engineers and assistant engineers on furlough. Under the present arrangement, when the engineer is on furlough and the assistant engineer is at meals, the engine is useless until the arrival of the engineer or assistant engineer.

I would also call your attention to the necessity of providing proper fire protection for the Island residents and property. There is no protection of any kind, and if a fire were to occur when a strong wind was blowing, the result would probably be disastrous. A number of hydrants would have to be erected on the water mains, in addition to which one or two reels of hose could be located at a convenient point on the Island and be operated by the Islanders in case of fire.

#### FINES, SUSPENSIONS, RESIGNATIONS AND DISMISSALS.

Members of the Department have been fined for the following breaches of discipline :

|                                |   |
|--------------------------------|---|
| Disrespect of discipline ..... | 4 |
| Resignations .....             | 3 |
| Dismissals .....               | 1 |

Outside of the above, the discipline of the Department has been excellent. The officers and men have displayed great alacrity in the discharge of their duties, and are deserving of commendation.

---

In conclusion, I most sincerely thank the officers and men of the Police Department, who have always shown a very kindly disposition to assist the Department in every possible manner, a service that I keenly appreciate, and take this means of acknowledging.

Thanking you for the many courtesies extended to the officers and men of the Department,

I have the honor to be,

Your obedient servant,

THOMAS GRAHAM,

*Chief of Fire Dept.*

ANNUAL REPORT  
—OF—  
SUPERINTENDENT OF TELEGRAPH.

---

OFFICE OF SUPERINTENDENT FIRE ALARM TELEGRAPH,  
Toronto, December 31st, 1897.

*Thos. Graham, Chief Fire Department :*

DEAR SIR,—I have the honor to submit herewith a report of the extensions and repairs to the Fire Alarm Telegraph for the year ending December 31st, 1897.

The Committee on Fire and Light have taken more than an ordinary interest in this Department during the year, having put in seven new fire alarm boxes, and changing seventeen of our boxes to the latest style of tell-tale, keyless outside doors.

The experience has demonstrated that the City is a gainer thereby, and the public highly appreciate their action. The fire alarm system has in years past worked perfectly, but within the last few years things have developed in the distribution of high tension currents, making it necessary to meet and overcome them.

Plants that were calculated heretofore to be perfectly safe, have been destroyed in a second by coming in contact with high tension wires. On March 9th, 1897, our wire came in contact with an electric light wire, burning out galvanometers, and partly destroying our repeater, several of the fire alarm boxes, gongs and stable magnets. This is not likely to occur again, as the repeater, office plant and

---

boxes are now rebuilt with the latest automatic and fusible cut-outs in them, guaranteeing perfect safety in future.

We have also overhauled our lines and poles, putting everything in good shape, and removed over fifty poles that were getting rotten, and placing our wires on good poles belonging to other companies, thereby helping to clear the street of unnecessary poles. We have also put up about six miles of new wire, which has reduced the resistance on the lines considerably.

The following is a correct inventory of the property in my charge, namely :

- 1 10-circuit repeater.
- 1 “ switch-board.
- 11 galvanometers.
- 5 bell strikers.
- 21 15-inch alarm gongs.
- 176 fire alarm signal boxes.
- 80 miles of wire, poles, etc.

I remain, yours respectfully,

DONALD GIBSON,  
*Superintendent Fire Alarm Telegraph.*
