# ANNUAL REPORT

#### OF THE

# TREASURER. OF THE CITY OF MONTREAL,

### CIVIC YEAR OF 1851,

ENDING THE 31st JANUARY, 1852.

MONTREAL: PRINTED BY JOHN LOVELL, ST. NICHOLAS STREET.

-----

#### To the Aldermen and Councillors of the City of Montreal.

GENTLEMEN,—The present being the last meeting of the Council, over which I have had the honour to preside, since the month of March, 1851, I beg leave to lay before you a compendious Statement of the Financial Affairs of the City; and I take occasion to accompany it with a brief retrospect of the labours in which we have all been engaged for the last twelve months. The financial information, given in the condensed shape in which it is now placed before you, will be found in detail, and in a more explicit form, in the Treasurer's Annual Statement, which will also be submitted to you this evening; and to this latter Statement, prepared with great care and much labour, I would respectfully refer all who take an interest in the welfare and progress of our city, or desire to obtain an accurate knowledge of our fiscal position.

The gross revenue of the present year has exceeded that of the preceding one, by the sum of £627 9s. 7d., only; the revenue of 1850 having amounted to £31,656 9s. 9d.; that of 1851 to £32,283 19s. 4d. The collections of this year have, however, exceeded those of the preceding one by £2,545 14s. 7d.; the revenue collected in 1851 having amounted to only  $\pounds 27,655$  16s. 3d., while the revenue collected this year, has amounted to £30,201 10s. 10d. The arrears of revenue, at the time I took office, remaining unpaid, from former years, say from as far back as 1843, amounted in all to  $\pounds 8,200$ , Cy. Of these arrears the sum of  $\pounds 4,290$  11s. 8d., Cy., has been collected this year, independently of the collected revenue already referred to. The interest of bonds, remaining unpaid at the close of the last civic year, amounted to the sum of  $\pm 559$  8s. 1d. Not only has this interest been all paid, but all the interest due on bonds up to the close of the civic year, just terminated, has been promptly and fully paid; and as publicly stated, on a very recent occasion, by the President of the Montreal Bank, the Honourable Peter McGill, the effect of this punctuality, in the payment of interest, has been to advance the bonds of the city from a large discount to nearly a par value. Divers claims for damages against the city, some of them pending for years, have been settled during the past year; and the outlay thus expended, has amounted to the sum of  $\pounds 1,113$  13s. 7d. Part of this sum was for damages at the last Municipal Elections, an expenditure that will be avoided in future, by the operations of the present law regulating these elections. In connexion with the subject of the augmented revenue of the present year, it may be proper to observe that the receipts of the Mayor's Court have increased 90 per cent. this year, over that of former years; and this, notwithstanding that the Court may be said to have been in abeyance, since the month of November last, at which time application was made to the Executive for the establishment of a

Recorder's Court in its stead. As evidence of the exertions made to collect the revenue, I may be allowed here to state, that the arrears of the past year's revenue amount to only half the sum of arrears of the preceding year.

#### THE AMENDED ACT OF INCORPORATION.

The Acts relating to the Incorporation of the City were no less than four in number. Many of these Acts had been found to be insufficient, and others had become inapplicable to the advanced and improved state of our society and circumstances. A new bill, amending these provisions, and consolidating the whole of the previous enactments, was prepared under the superintendence of this Council, last summer, and submitted to, and passed in, the last Session of our Provincial Legislature. The authority and powers of the Council, thus embodied in one Act, may be ascertained with precision, and can easily be referred to; besides which, many important advantages, anticipated from the New Act, have already been felt. Among other benefits which may be expected to flow from it, not the least considerable, in a local point of view, is the revision and consolidation of the Bye-Laws and Police Regulations of the city; a work which, I am happy to state, has already been begun, and will early be proceeded with to completion.

#### NEW CITY HALL AND OFFICES.

Much inconvenience having been long felt, from the want of suitable accommodations in the old City Hall for the Council, and Public Offices attached to the Corporation, the south western section of the second story of the Bonsecours Market has been fitted up into the spacious Hall and commodious Public Offices, now in the occupation of the Council. The north eastern section of the building has been converted into a magnificent and extensive Hall or Concert Room, 160 feet long by 46 feet broad, and 20 feet high, capable of accommodating about 3000 persons. Another, but less extensive, apartment, has been prepared for public meetings of the citizens less numerously attended, or for any other purposes of a public nature for which it may be required. Besides these, there are also two other apartments in the same wing, one above the other, 67 x 37 feet each, intended for refreshment or dressing rooms, or any other necessary purpose, on occasions when either or both of the Halls may be occupied by public assemblages. Thus, the upper part of this immense building has been changed within the last few months, into the most elegant and convenient City Hall in British North America, and into as spacious and superb Halls for public meetings, concerts, or assemblies of any kind, as may be found in any city, in the northern section of this country; and all this by judicious management and careful attention has been economically effected, at an expenditure of only £2,600.

#### ST. ANN'S MARKET.

The unsightly ruins of the Parliament House have been removed, and a new and elegant brick market-house has been erected on their site, at the junction of the West and St. Ann's Wards, at a cost of  $\pounds 2,700$ . This improvement was loudly called for by the necessities of these and the adjacent Wards, and will prove of infinite service and accommodation to the extensive population of the whole southern and western sections of the

city. Viger Market in St. Louis Ward has also been extended and improved; and the business done thereon has been in consequence much augmented.

#### ROAD COMMITTEE.

Many valuable improvements have been effected in the department under charge of this Committee. The melioration of Place d'Armes has been completed. The Square has been planted with Forest trees, and embellished with shrubs, annuals and flowers; and convenient and well executed walks have been constructed both within the Square and outside along the faces of it.

A jet d'eau has been constructed on Viger Square, which has also been ornamented with Forest trees, and intersected by substantial carriage ways and walks.

Dorchester and Lagauchetière Streets have both been extended, the latter from St. Denis to St. Hubert Streets, by which means a direct communication has been opened from St. Louis to St. James Ward, to supersede the circuitous routes by Viger Square and St. Lewis Streets: and there exists no doubt, that the facilities of communication between these populous Wards, will be further promoted by the completion of Dorchester Street, at an early date. Much of the low ground in several sections of the city has been drained; and the creek from the College Garden through the Recollet or St. Joseph Suburb, and also the tunnel in Craig Street, have been thoroughly cleaned.

Wooden foot-paths have also been laid down to a very considerable extent : and preparations are now in progress for their further extension next season.

Labelled Boards, to indicate the Streets and Wards of the city, are now being painted, and will be affixed in proper places early in the spring.

A Contract has been entered into with responsible parties, to pave certain Streets, as soon as the weather will permit of its being done, with dressed stones from the Abord a Plouffe quarries.

The duties of the other Standing Committees of the Council have received the attention and care of the members to whom they were severally entrusted; but, with the exception of the Water Committee, are not of a nature to require any detailed notice at this time. The Revenues and Expenses of the Market are furnished at length in the Treasurer's Statement. As many additional lamps have been erected as the extension of the Gas Works permitted of, and without any additional expense for lighting them, by the removal of an equal number from those Streets in which there were previously too many lights. The Fire Brigade has been characterized by the efficiency and zeal which has always distinguished this meritorious and public spirited organization of our fellow citizens. The details of their services are furnished in the Report of the Chief Engineer; and, though happily not so numerous as in preceding years, are sufficient both in importance and number to merit the thanks of the community. The duties of the Chief Engineer have been attended to with punctuality and vigilance, and I have reason to believe he enjoys the confidence and esteem of his Department.

#### WATER WORKS DEPARTMENT.

The labours of this Committee have been unremitting to improve the works under their charge, for the purpose of furnishing a copious supply of pure and wholesome water, at all times, and to all the city; and the extension of pipes of a large calibre, made this year, together with the improvements contemplated to be made this season, leave no room to doubt that the exertions of the Committee will be crowned with success; and that the supply of water in Montreal will, ere long, be so ample and constant as to materially diminish, if not altogether remove, all danger from fire, at least in the principal and most populous parts of the city.

Eighteen hundred and thirty-nine yards of 6 inch pipe have been laid down this year, in Bleury, Lagauchetière and St. Lawrence Streets, the pipes in the latter street being laid down from Sherbrooke to Craig Streets; 1104 yards of 8 inch pipe have been laid down in Craig Street; and 618 yards of 10 inch pipe in Sherbrooke Street—the whole at a cost of £2,623 8s. 1d., Cy.

Three hundred and fifty tons of pipe of 10, 8 and 6 inch calibre have been ordered from Scotland, and will be delivered here by the first spring arrivals; and these additional pipes will be laid down, in the manner and throughout the extent detailed in the Report of the Committee, submitted to the Council in the month of October last past. These extensive works have been made under the able superintendence of Mr. Garth, the Engineer of the Water Works. The Books and Accounts of the Department have been carefully and correctly kept by the Book-keeper, Mr. Dupré, whose attention to his duties is deserving of notice.

In consequence of the decayed and nearly ruinous state of the old Engine House, on Commissioner Street, attached to the works, that building had to be taken down to the foundations, and a new and substantial one erected in its stead, the whole of which has been done at a cost of  $\pounds 628$  1s. 11d., Cy.

The repairs made to the Works during the season have been extensive, and have amounted to  $\pounds 609$  4s. 3d.: nevertheless, I am happy to be able to state that the sum of  $\pounds 220$  2s. has been posted to the credit of Profit and Loss, on the operations of the year.

On this occasion of the termination of our Civic labours for the year, I have a gratifying duty to perform towards the principal officers of the Council. My position has necessarily placed me in close relation to these gentlemen; and it has afforded me constant opportunities of observing the manner in which the important duties devolving on them have been fulfilled. I most cheerfully bear testimony to the zeal, ability and attention of each, and all of them. By its unanimous recommendation in behalf of the City Clerk, this Council has unmistakeably expressed its sense of his ability and services; and I am confident I but embody the unanimous wish of this Council, both on the City Clerk's own account, and on that of his assiduous and able assistant, when I express my confident hope that the Executive will, by conferring on the former the office of Recorder, enable the Corporation to reward the assiduity and merit of the latter, by promoting him to the vacant City Clerkship. The arduous duties of the City Treasurer have been most indefatigably.

and ably attended to; and the valuable services of this meritorious officer will, I am persuaded, receive from this Council that consideration to which they are so eminently entitled. The duties of the City Surveyor, I have reason to believe, have been fulfilled with care and attention; and to the perfect satisfaction of the Road Committee.

I have now, gentlemen, only to thank you all—and I do so most sincerely and fervently —for your hearty co-operation with me in the public labours to which I have adverted, as having occupied our attention during the past twelve months; and I am not less grateful for the consideration and respect uninterruptedly and freely extended to me on all occasions, and by each and all of you, since I have had the honour of being called to this Chair. Our deliberations have been characterized by harmony, moderation and good feeling; and I sincerely trust they have not proved altogether useless or profitless to the public. Our official intercourse has been distinguished by mutual respect and esteem; and I cannot help regarding its termination with feelings of sincere regret.

CHARLES WILSON,

Mayor.
