HOUSE OF INDUSTRY.

FIFTY-NINTH ANNUAL REPORT OF
BOARD OF MANAGEMENT.

1895-96.

1. The Trustees and Managers of the House of Industry submit to the subscribers and the public the Fifty-Ninth Annual Report of the affairs of the Charity.

INMATES.

2. During the year efforts have been made to induce the City Council to grant sufficient funds to enlarge and improve the accommodation for inmates which is a pressing necessity, attention to which has been called in several previous reports.

Such a grant, it is alleged is not within the legal power of the corporation and it is intended to ask for the necessary legislation in the near future.

Meanwhile a portion of the Casual Poor premises is utilized to accommodate the overflow from the Main Building.

OUTDOOR POOR.

3. Owing to the continued depression in the building trade and other lines of labour-employing industries the number of unemployed is still very large.

The cost of relief afforded during the season of 1895-96 is considerably less than the previous season as the following comparison shows:—

	FAMILIES RELIEVED.	PERSONS.	EXPENSE.	PER CAPITA.
1894-5	2484	11498	\$13531 28	1.18
1895-6	1962	8532	9704 72	1.14

It will be observed that the cost during the season just closed is \$3,826.56 less than the previous year. This may be attributed to two causes:

(1.) The price of coal during the past season was the lowest for years, the reduction in this item alone is \$2,650.69 compared with last year ; but the chief cause in the reduction must be attributed to the management adopting a rigid labour test requiring all able bodied men to break a stated quantity of stone before relief would be granted.

Numbers refused relief on this account and doubtless many others refrained from making application, hearing that the management resolved to apply the test without exception to all able to work.

Full details are supplied in the accompanying report from the Chairman of this department.

AMALGAMATION WITH LADIES' RELIEF SOCIETY.

4. The question of amalgamating with The Ladies' Relief Society in order to avoid duplicating relief, was fully considered by joint special committees and after very careful investigation it was found that the scope and aim of the two charities was essentially different and that no advantage would be gained by amalgamation and that the interests of the poor would be best served by continuing to work on separate lines as heretofore.

5. The subscribers and friends of the Charity are referred to the accompanying reports of the Superintendent and Chairmen of the various standing committees for full particulars and details of work in each department.

6. The Treasurer's Statement furnishes information as to receipts and disbursements of the combined work of the House, but by reference to the Superintendent's Report, the cost of maintaining the inmates, sheltering the casuals and distributing relief to outdoor poor is separated for the information of subscribers.

7. Public institutions however well managed must as a rule expect the attention of the unfriendly critic and this House is no exception to the rule. Hints of extravagance and mismanagement have often found expression in the press. The best answer to the former is the records of the House showing that during the period in which the population of the city quadrupled the cost of administering the various departments of the Charity has not doubled, and lists of the names of the visitors

and managers at present in office are appended as a reply to the latter.

8. The Board of Management have to report with deep feeling of regret the loss to the Charity of four of the most active and prominent members during the year by death, viz. :—

Mr. Robert Gilmor, Vice-President, had rendered 32 years service.

Rev. D. J. Macdonell, Vice-President, 24 years.

Mr. James Scott, 19 years (14 years of which he acted as Treasurer), and

Mr. John Bailie, 13 years.

The removal of four such men in one year from amongst the friends of the poor is no ordinary loss, but one which will be severely felt by the Institution.

9. The Gas Company with its accustomed liberality supplied, free of charge, 2,000 bushels of coke for distribution.

10. The usual religious services are maintained and the Board desires again to express its obligation to the ladies who continue to render valuable services in this connection and looking after the comfort and welfare of the inmates in various other ways.

11. Mr. Laughlen the Superintendent, ably assisted by his wife, continues to discharge his duties to the utmost satisfaction of the Board. Mrs. North, assisted by her daughter (the latter without fee or reward) performs the work requiring the matron's supervision in every way satisfactory.

All of which is respectfully submitted.

JOHN GILLESPIE,
Secretary.

SAMUEL ALCORN,
Chairman.

THE ANNUAL REPORT OF THE EXECUTIVE
COMMITTEE, 1896.

The Executive Committee of the House of Industry desire to bring to the notice of the citizens of Toronto, that while for years hardly any one has thought it worth while to attend the Annual Meetings of this Institution, while few read the Annual Report, and while many bitter things have been said against it by people who have taken no care to inquire into its working, the Council of the City Corporation, after a very strict investigation of its method, voted the sum of \$14,000 to be expended on the poor through this House.

Your Board has stated to the special committee of the Executive of the Corporation, that they are ready upon due notice to cease to act in the capacity in which for years they have acted, as soon as some better mode may be adopted, or at the will of the Corporation. The Executive will doubtless determine their mode of action before October of the present year.

The amount received from the Government of Ontario for inmates was \$2,526.37. We have again to thank those citizens who have contributed to the support of this Charity. We have had in the House 151 inmates; we have assisted 1,962 families, or 7,080 persons, at a cost of \$9,702.72. Tramps or casual poor, 1,472 at a cost of \$1,376.47. This class are now only allowed 3 or 4 nights (4 if the 4th be a Sunday).

The test of breaking stone by the able bodied men, whether residents or casuals, has been found successful in reducing the amount distributed, and also in the gain of \$488 from the 61 toise of stone broken.

The drainage of the Institution having been rightly condemned, we were obliged to put the same in perfect order, which we have done, at the cost of \$514 under the very careful management of Mr. John Wright. His work revealed many things, any one of them enough to have caused much sickness, and among them an old well under the kitchen full of foul water.

We were also obliged to repair the roof as it failed to keep out the rain, and a portion of it has been reshingled, the contract price being \$226, J. C. Scott being the contractor.

three. The total number of men in the second class, viz., the poor, homeless men of Toronto, who were any time in the lodge during the same year, is 450, and of them, 208 were not there more than three nights; leaving 242 men who have been in the lodge three or more nights during the year. The highest number of nights that any one of this class was in the lodge is 77. The total number of women for the year is 74, so that the total number of men and women sheltered by the lodge for the past year was 1,472 persons, a large percentage of whom belong to the city.

In applying the labour test, the Board decided this year, for various reasons, to substitute stone-breaking for cutting and splitting wood, the quantity of stone broken to be equivalent, for each person, to the quantity of wood cut and split in past seasons. The change is not popular with the frequenters of the lodge. The quantity of stone broken is eleven toise.

The wayfarers begin to come into the lodge about five in the afternoon, and no one of average orderly conduct is refused admission up to ten or twelve o'clock at night.

Each wayfarer must take a bath upon coming in, after which he is provided with a good clean night shirt and a comfortable bed in which he sleeps till about 6.30 next morning. Breakfast is at 7 o'clock, and work begins in the yard at 8 o'clock.

The labour test requires from each man from two to three and one-quarter hours. The wayfarers who wish can have a good bowl of soup and a liberal allowance of bread with it at noon each day after the assigned work is finished.

The labour test has been continued for the four winter months of December, January, February and March. This is the sixth winter during which your Committee has tried it. The reports of your Committee from year to year show that the effect of the labour test has been beneficial. But your Committee must express its conviction that more should be done for the wandering poor than has yet been done by the Board. Hitherto we have brought the tramp up to a certain stage in recovering industrious inclinations, but we have allowed him to slip from our hands before these inclinations have been formed into habits of industry.

What the Board should now aim at is the establishment of a labour colony, to which all able-bodied and chronic mediacants should be committed with interminate sentences. The incorrigible idlers and tramps need a thorough course of reformatory treatment; they should be kept in confinement until their bodies, which are generally saturated with tobacco and alcohol, are renovated and brought under normal conditions; until they have received some necessary industrial training, and until there is some fair assurance that they will become, if discharged, producers instead of parasites. The effect of the labour test will be necessarily incomplete till this labour colony or farm is added to our labour test.

REPORT OF COMMITTEE ON OUTDOOR POOR.

To the Board of the House of Industry :

Your Committee desire to express their sincere satisfaction with the amount of work done by the visitors of this House. The marked reduction in the cost of the present year as compared with previous years, speaks for itself.

In the early part of the season when the visitors were about to enter upon their duties in the various districts of the city, a conference of these gentlemen was held here. Many matters of interest were considered, important information was given by the older and more experienced visitors on various aspects of their delicate and frequently trying work. With a rare exception or so, the services rendered by the visitors have given general satisfaction.

Your Committee have earnestly sought to restrain tendencies to be over liberal, also to guard against anything like harshness or unnecessary strictness.

The labour test has given general satisfaction to the Committee

but not to many who were asked to work. To this test along with the faithfulness of the visitors is to be attributed the large reduction in expenditure.

Number of orders issued for breaking stone 940 :

Worked	757
Doctor certified not able to work	19
Did not work	164
Total	940

Potatoes distributed to outdoor poor, 312 $\frac{1}{4}$ bushels.

Fifty toise of stone were broken by outdoor poor at a value of \$8 per toise, or \$400. Thus, the outdoor poor earned for the city \$400 by doing the above work.

THE MEDICAL OFFICER'S REPORT.

I have the honour to report a very gratifying decrease in the amount of preventible sickness in the House of Industry as a result of the very thorough and extensive improvements in the drainage of the basement and outer premises completed last year, and at the same time I find that nine men and four women have died (since my last report), of chronic and incurable diseases, or acute apoplectic attacks, in which medicine was powerless to avert the fatal issue, although able in some degree to mitigate the suffering.

Respectfully,
