

SCOTT'S  
EMULSION  
A Food  
Medicine.

FOR DELICATE BABIES, ENFEEBLED MOTHERS.

The picture on the other side is an actual photograph of the wife and child of a Norwegian Cod fisherman.

These rugged, hardy fisher-folk learned, ages and ages ago, the great value of Cod Liver Oil as a warming, strengthening, fat-producing food, and as a healing, curative medicine.

During their long cold winters, they take it constantly to make the blood rich and warm, and in summer to keep up flesh and strength. They are probably the strongest, healthiest people in the world, and they owe their health and strength largely to the free use of Cod Liver Oil.

SCOTT'S EMULSION is this same Cod Liver Oil, perfectly and permanently combined with Glycerine and the Hypophosphites of Lime and Soda. It is as pleasant as cream, and so easy to digest that even the youngest child and most delicate invalid can take it.

SCOTT'S EMULSION is a three-fold remedy: the Cod Liver Oil is unequalled as a fat-forming, blood-enriching food; the Hypophosphites are the strongest of nerve tonics, and aid in the formation of bones and teeth; the Glycerine is remarkable for soothing and healing properties possessed by no other remedy.

For more than twenty-five years SCOTT'S EMULSION has been the Standard remedy for lung troubles, preventing Consumption, by quickly curing simple colds and stubborn coughs, and often absolutely curing the disease in its early stages. It heals the irritated membranes and strengthens the lungs; it gives new life and vigor to delicate boys and girls. To the nursing mother it gives flesh and strength, while increasing and enriching the baby's food.

All druggists, 50 cents and \$1.00.
