ISLANDS

AMONG THE 1000 ISLANDS.

THE THOUSAND ISLANDS OF THE RIVER ST. LAWRENCE.

PREFACE.

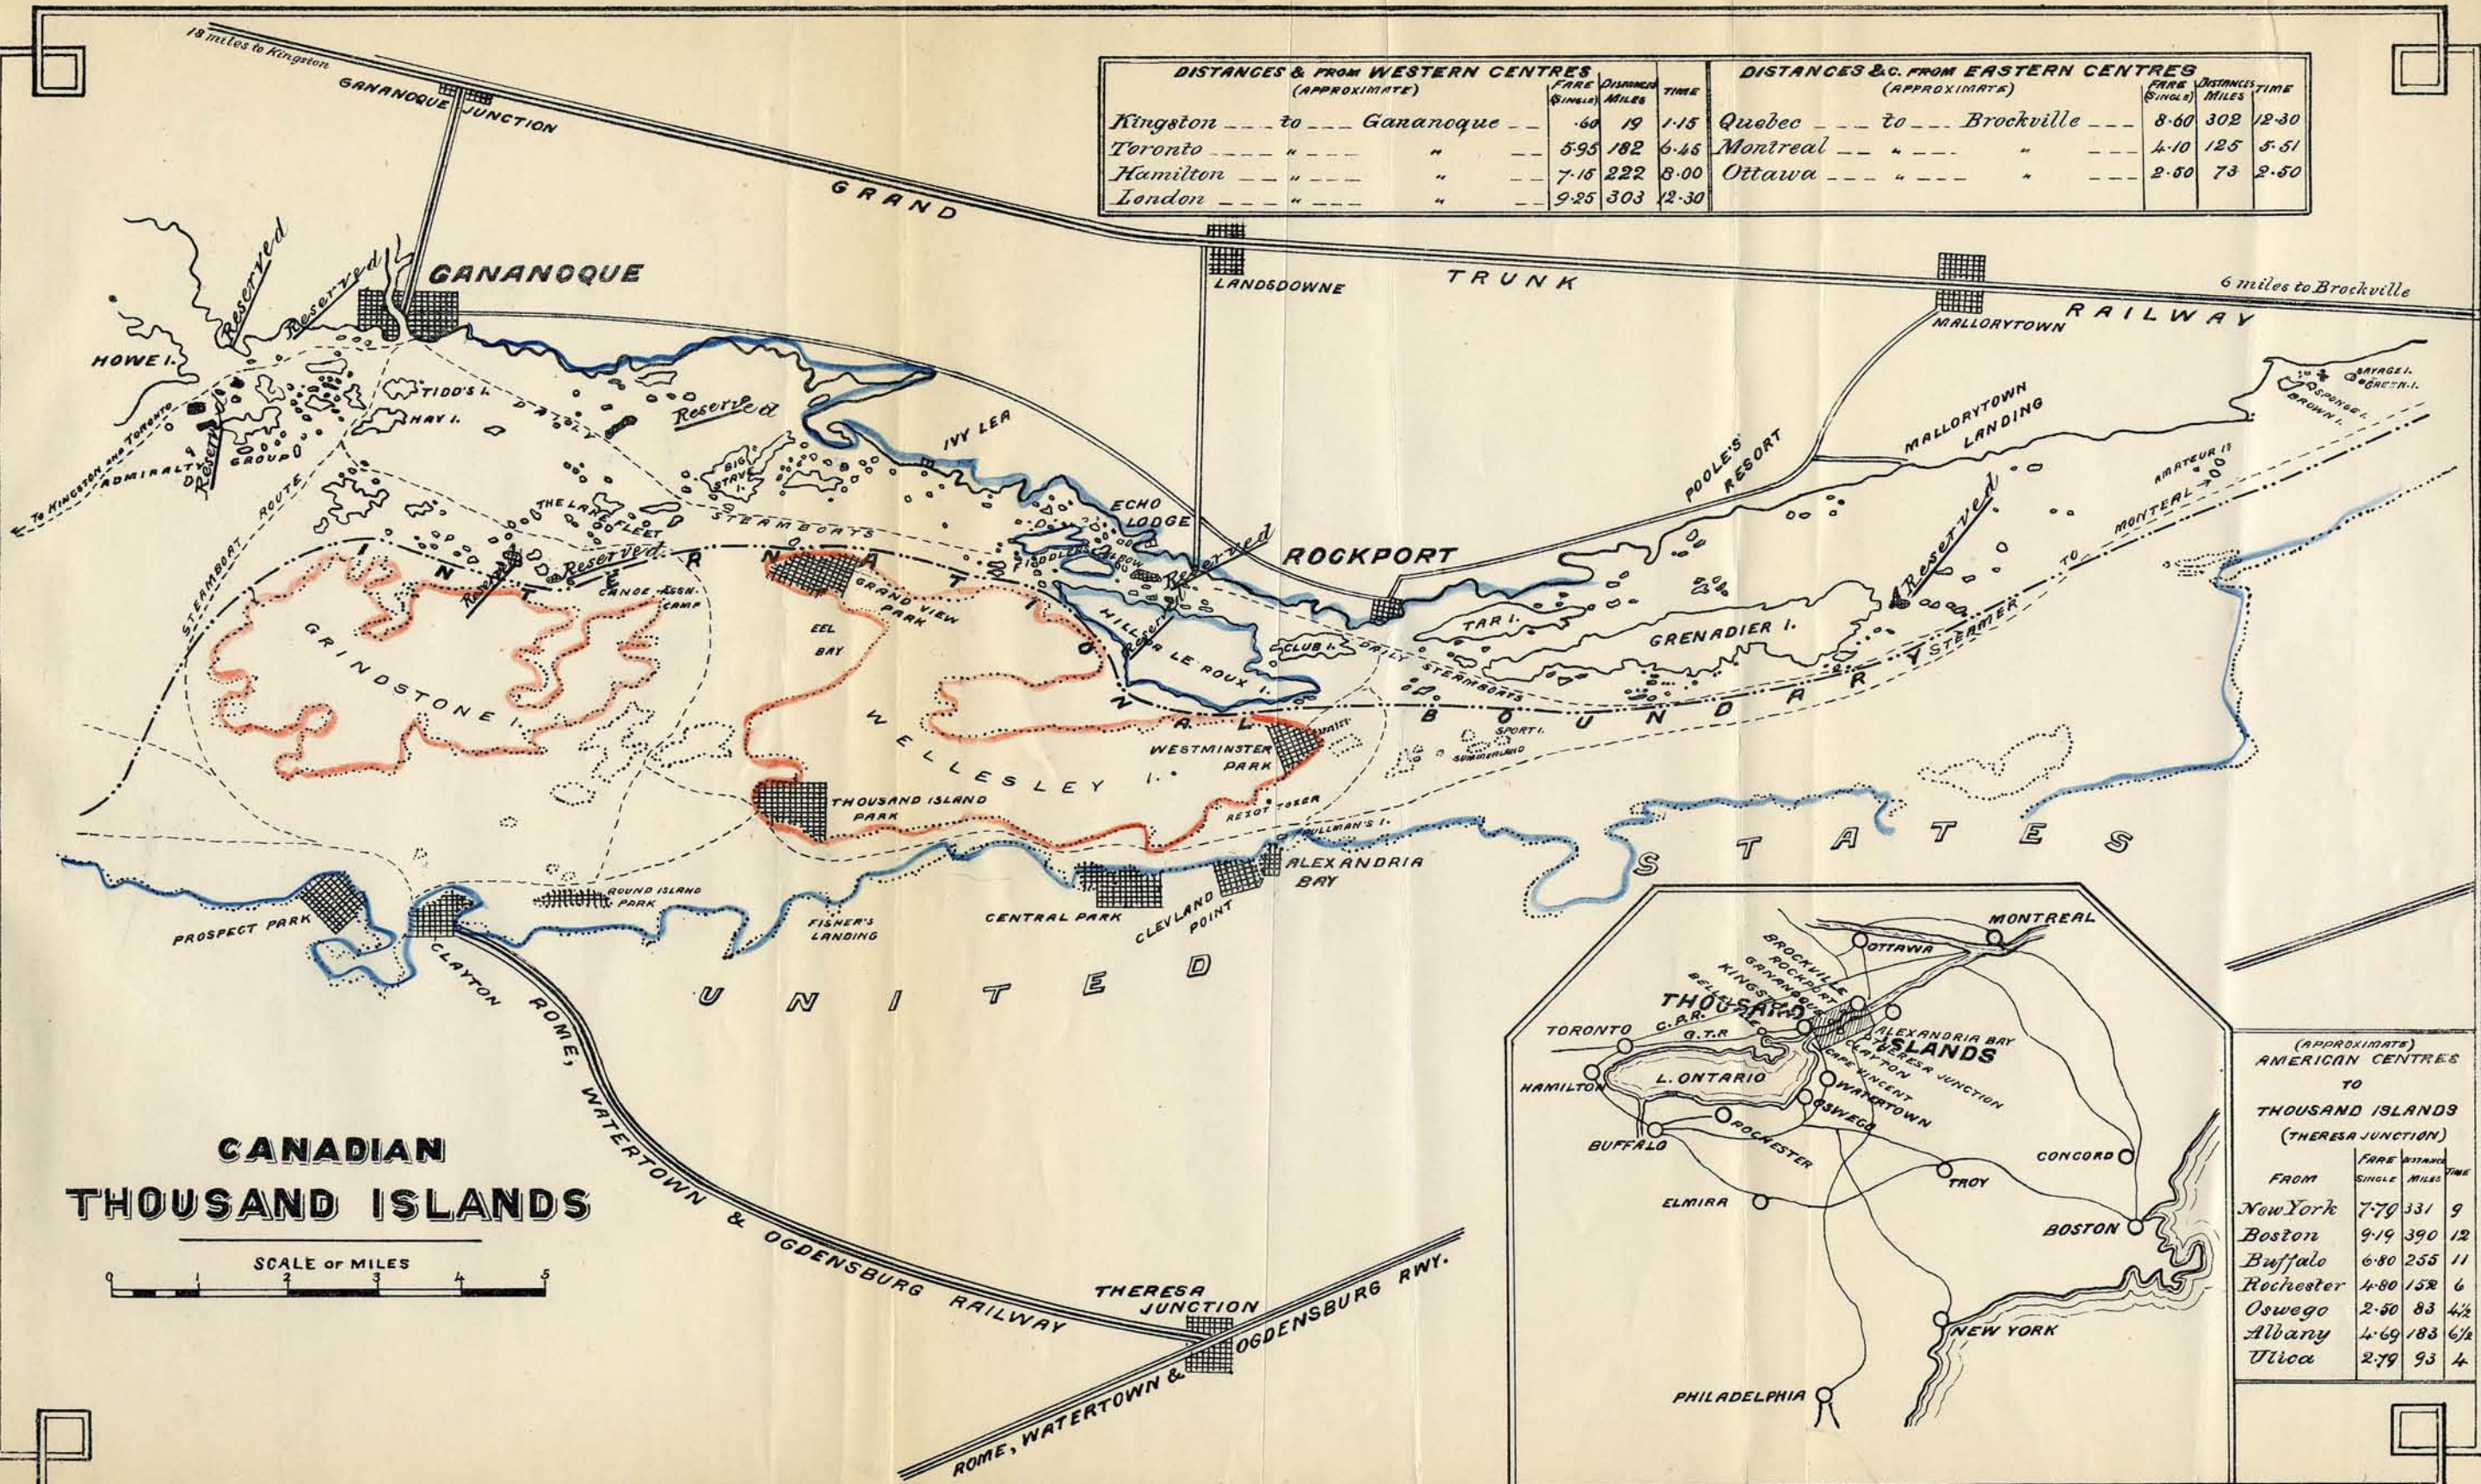

This pamphlet is intended to supply information to intending purchasers of Islands in the Canadian portion of this beautiful district.

The Government of the Dominion, which is the Trustee of this property, has determined to sell immediately all the undisposed of portion of it which lies opposite the Townships of Leeds, Lansdowne, Escott, and Yonge, as shown in the Descriptive List herein. This will place upon the market between 600 and 700 of the most beautiful and picturesquely situated Islands on the continent, and offer unprecedented opportunities for obtaining lovely and salubrious summer homes.

The map at the end of the pamphlet gives the surroundings and location of each Island. The designation (by name or number) on the map enables reference to be made to the Descriptive List. The latter contains the area, brief description, and upset price of each Island.

The small map herewith gives a general or geographical view of the district, and information as to distances, &c., from United States and Canadian cities.

ISLANDS TO BE SOLD.

The Islands now offered to the public lie as far west as Wolfe, or Long Island, and eastward extend to where the river narrows, some twelve miles below Alexandria Bay. There, passing the Amateur Group, it becomes rapid again after disporting itself for so long amongst Island scenery such as can nowhere be surpassed. When these Islands are sold, twenty-five miles of the St. Lawrence River will be given over to pleasure and health purposes, and the grand park thus constituted will be one of the largest as well as one of the most beautiful watering places known. As there are, within these limits, no less than 1,400 Islands (American and Canadian) the old supposition from whence the name "Thousand Islands" sprang proves to be within the truth, rather than beyond it.

The cool, deep shades of these Isles, thrown upon almost fathomless waters, are very tempting in the hot days of summer. To no better place can city inhabitants repair. In this land of granite, shadow, pine, and water, trying heat is unknown. There are cliffs so steep, and woods so thick, as to give perpetual shade; and here cool breezes blow constantly, stirred by the ever rolling waters. The canoeist finds among these Islands corners that are dark, cool, and comfortable in the hottest days; yachts, with their white wings spread, carry pleasure seekers from Island to Island, and in the channels fast running steam crafts hurry hither and thither, carrying tourists to and fro. In and out the channels wind, opening at one moment into some lovely extended vista, the next closing and leading into labyrinthine ways where granite walls and outstretched branches almost graze the passing steamer, as it threads the mazes of this fairy-like land.

Sportsmen find occupation for rod and gun in the waters are found bass and maskinonge; wild fowl in season are plentiful, but it is to the pleasure seeker, the idler, the lover of the picturesque, the artist, the tired man of business, and those in whom romance and a wish for comfort lie, that the cool beauty of the Islands appeals.

It is impossible to compare the groups; all are equally beautiful, and equally well situated for summer homes. The Admiralty Islands, between Clayton and Gananoque, are already much improved and a most popular resort; many of them are for sale. The Lake Fleet Group is perfect both in point of situation and natural attractions. Lying near the International boundary, in a most popular part of the River, they have long been sought after by Americans who want property near where friends are already established. The Navy Islands, and those at Fiddler's Elbow and below it, are too well known to need any comment, but the remark of a traveller concerning them may be quoted: "At every turn fresh loveliness."

HOW REACHED.

Accessibility is one of the great recommendations of this district. It is in direct communication with the world. No lumbering stage coaches carry the Islander into remote parts, where the mail service is bad and telegraph offices distant. Buried in seclusion as one may be amongst them, in an hour or two at most the great railways can be conveniently reached. On the Canadian side, at Brockville, both the Canadian Pacific Railway and Grand Trunk Railway connect with the Royal Mail steamers which daily pass through the Islands, calling at Alexandria Bay, Gananoque and intermediate points. At Gananoque the Grand Trunk Railway connects with the river, and all the steamers, by the Thousand Island Railway; and points between Gananoque and Brockville can be easily reached from the Grand Trunk Railway stations of Mallorytown and Lansdowne. On the American side the Clayton Branch of the Rome, Watertown & Ogdensburg Railway, and numerous steamers connected therewith give access twice a day to nearly every part of the river. (*See map.*)

CUSTOMS REGULATIONS.

The International boundary presents no serious obstacle to Americans who may desire to spend a few months amongst the Islands, and acquire homes on the Canadian side; nor need residents on this side fear that they cannot enjoy the life of the American watering places, as well as the seclusion our Islands afford; so pleasantly are the customs regulations administered. It is not the object of either Government to make trade laws irksome to pleasure and health seekers, and it is not found that those who act in a proper spirit are incommoded by them: this will be seen from the following Memorandum and Permit of Her Majesty's Customs, for pleasure boats:

TITLE.

There is no question whatever of the right of American citizens to hold lands in Canada. The title given to these Islands is by letters-patent from the Crown. The state of the law in the United States has caused question upon this point. That question is here set at rest.

TERMS OF SALE.

The terms of sale are as follows :—

Not less than the price published in the Descriptive List will be accepted.

In the event of there being two or more applicants for any particular island, the applicants to be asked to tender, and the island to be sold to the highest tenderer.

The purchase money to be paid in cash, or one-quarter cash, and the balance in three equal annual instalments, with interest at 6 per cent per annum on the unpaid purchase money.

Not more than two islands to be sold to any one purchaser.

No conditions as to settlement or improvement.

Applications to purchase in the Gananoque district are to be made to John Ormiston, Esq., Collector of Customs, Gananoque, Ontario, and in the Rockport district to Joseph Cook, Esq., Rockport, Ontario, and to the Department of Indian Affairs, Ottawa. These districts are defined on the map in the pocket at end of pamphlet.

No sales will be made before the 2nd July, 1894.
